SUMMARY

Experienced Django developer with a strong specialization in building scalable back-end systems using Django Rest Framework (DRF). Proficient in designing and implementing robust RESTful APIs for diverse applications. Skilled in front-end technologies, including React, HTML, CSS, and JavaScript, enabling seamless integration of user interfaces with back-end services. Adept at full-stack development with a primary focus on back-end expertise. Passionate about delivering high-quality, efficient, and maintainable solutions tailored to meet business needs.

CORE SKILLS

- **Back-End Development:** Extensive expertise in Django and Django Rest Framework (DRF) for building scalable and secure RESTful APIs.
- **API Development:** Strong skills in designing, testing, and maintaining APIs with authentication and authorization mechanisms (e.g., JWT, OAuth).
- **Version Control:** Proficient in Git for source code management and collaboration.
- **Containerization:** Skilled in using Docker for containerizing applications, creating reproducible development environments, and streamlining deployment processes.
- **Deployment:** Experience deploying Django applications to platforms like AWS, Heroku, or Railway.
- **Testing:** Proficient in writing unit tests and API tests using pytest and Django's testing tools.
- **Task Queues:** Hands-on experience with Celery and Redis for managing asynchronous tasks.
- **Real-Time Communication:** Knowledge of implementing WebSocket functionality using Django Channels.
- **Basic Front-End Development:** Familiar with React, HTML, CSS, and JavaScript for creating simple user interfaces and integrating back-end APIs.
- **Front-End Development:** Proficient in React, HTML, CSS, and JavaScript for creating responsive user interfaces and integrating them seamlessly with back-end APIs.

PROFISSIONAL EXPERIENCE

March 2021-2023

Web Content Editor

- Collaborated with clients to understand their content needs and goals.
- Created and edited webpage content, ensuring alignment with client objectives and industry standards.
- Implemented LCP optimization strategies to enhance webpage loading performance.
- Integrated text and visual elements, focusing on improving user experience and page loading times.

- Conducted regular performance assessments and made adjustments to improve overall page speed.
- Implemented SEO best practices to improve the visibility of web content.

Key Achievements

- Successfully implemented LCP optimization techniques.
- Demonstrated proficiency in optimizing web content for performance. Received positive feedback from clients for improved website speed and user experience

Online Teaching Platforms:

- ZOOM
- ANYDESK

I have experience teaching Django, HTML, and CSS through online platforms such as Zoom and AnyDesk. In my role as an online instructor, I delivered comprehensive lessons covering various topics in web development. For Django, I taught concepts including models, views, templates, forms, and Django REST framework. In addition, I provided instruction on HTML for building the structure of web pages and CSS for styling and layout.

My teaching approach involved interactive sessions, hands-on exercises, and real-world examples to reinforce learning. I assisted students in understanding fundamental concepts and applying them to practical projects. Received positive feedback from students for clear explanations, engaging lessons, and effective teaching methods.

Collaboration with Orhan Technology

- Developed **Leave Management System** and **Employee User Management** apps using Django Rest Framework (DRF) for a web application.
- Designed and implemented RESTful APIs to handle leave requests, user authentication, and employee data management.
- Integrated a two-step authentication system for secure user login.
- Wrote comprehensive unit and integration tests using **pytest** and **factory_boy** to ensure application reliability and maintainability.
- Worked in a Continuous Integration/Continuous Deployment (CI/CD) pipeline environment using Docker to ensure efficient development, testing, and deployment processes.
- Collaborated with the team to deliver high-quality, scalable, and maintainable code.
